

LOUISIANA CONNECTION

UNITED KINGDOM

FOREIGN DIRECT INVESTMENT

The United Kingdom is the most frequent investor in Louisiana, with 31 projects since 2003 accounting for over \$1.61 billion in capital expenditure and creation of 2,208 new jobs. Louisiana companies have also established a presence in the UK. Including 15 direct investments in the U.K. since 2003 that have resulted in capital expenditures totaling \$450.7 million and the creation of 501 jobs.

CASE STUDY

In December 2012, Drax Biomass announced plans to build a \$120 million wood pellet facility in Bastrop, Louisiana and a storage-and-shipping facility at the Port of Greater Baton Rouge. Drax now ships wood pellets formed in Morehouse Parish to its U.K. energy facilities for use in generating renewable power, and has added a second bioenergy manufacturing plant in LaSalle Parish. The original project created 63 direct jobs and an estimated 143 new indirect jobs. Drax Biomass also generated 250 construction jobs at the peak of the yearlong building phase.

To secure the project, the state offered Drax a custom incentive package that will include a \$1.7 million Economic Development Loan Program commitment that will not require repayment if the company meets payroll performance obligations. Drax will receive the services of the nation's No. 1-ranked state workforce training program, LED FastStart®, at no cost. The company also is expected to utilize Louisiana's Quality Jobs and Industrial Tax Exemption program incentives.

"This is an exciting step for us. With Louisiana's support, we are looking forward to moving these projects through development and into construction during the first part of 2013. Drax Biomass is focused on building and operating clean, safe manufacturing facilities that will support local economies, create long-term jobs, and interface with regional forest industries."

Chuck Davis
CEO, Drax Biomass International

AIR TRAVEL: On March 27, 2017 British Airways (BA) began service between New Orleans and London Heathrow. Securing direct service between Louisiana and Europe had been a long-term objective of the economic development, tourism, aviation and political communities for many years.
